

# ELEMENTS COPY & SYNC

On the  
Marketplace

Copy and sync issues, across multiple Jira projects

## Key features

- Clone, move and link issues in the same project or to another one
- Create issues manually or **on transition**
- Configure exactly what you copy and sync between issues: **fields, comments, attachments & status**
- **Control where and how** issues can be cloned
- Create **multiple subtasks** at once from a parent issue
- **Insight integration:** copy and sync Assets
- Display related issues on **Customer Portal**
