

**Display and edit
snippets of related
issues exactly where
you need them**

ELEMENTS OVERVIEW

Key features

- **Give a customized overview of related work to Jira users - agents, software and business teams alike - right inside the issue**
- **Spare Jira users the need to navigate from tickets to tickets to get relevant information, or update linked issues details**
- **Provide detailed status information to JSM customers about the work that's carried behind the curtain to resolve their request**

Popular use-cases

- **Epic Management**
- **Problem and Incident Management**
- **Release Management**
